

### Testimonials

“Before I met Dr. Hevner I couldn’t stand through my child’s 1 hour ballgame. I limped into the first appointment, and I walked out pain free! I no longer have any problems standing for prolonged periods of time. Dr. Hevner restored a quality back to my life that I had been suffering through for years prior.”

- Brian H.

“Over the years I’ve developed a lot of chronic pain related to working on a computer 40+ hours a week on top of having osteoarthritis and fibromyalgia. Dr. Hevner has alleviated a lot of my pain and helped to improve the mobility in my neck. I was nervous at my first appointment, but Dr. Hevner immediately put me at ease. I love that I leave appointments not only in less pain but also frequently with a laugh.”

- Laura D.

### **Caring Comes First at Hevner Chiropractic Center (HCC)**

HCC offers chiropractic services that are personalized, thorough, and with your comfort in mind. When you're in pain, the last thing you want is to be stressed out by a doctor's appointment. Dr. Edward Hevner, B.S., D.C., has been practicing for over 20 years and specializing in offering chiropractic services that set patients at ease.

Working with patients to understand their specific areas of concern, Dr. Hevner develops an individualized care plan that he will oversee from start to finish. As a single-practice practitioner, he provides continuity of care, tracks results and changes, and develops and adjusts your care plan as needed to achieve the best results.

Dr. Hevner utilizes the Gonstead technique, considered the "gold standard" of chiropractic techniques for safety and results, well researched and time-proven, most difficult technique to learn and master. He also provides nutritional advice to aid with inflammation, joint support, and general health.

### **A Unique Approach to Chiropractic Care**

Many people don't understand the benefits that chiropractic care can offer or have unfounded fears from not having experienced high-quality care. At HCC, Dr. Hevner's unique approach to chiropractic care centers on improving the quality of life for his patients. This includes:

- Expecting a 30-50% overall improvement in symptoms/findings in the first two weeks of care for most patients.
- Chiropractic methods such as ultrasound, adjustments, traction, stretching, and massage.
- Using Chiropractic BioPhysics (CBP®) for spinal curvature restoration, which can provide longer-lasting results, less extremity pain/symptoms, and slows degenerative processes in the spine.
- No rush appointments that allow for time for a variety of treatment options and discussion of patient progress.

### **We're Here for YOU!**
